

The Anasazi Oven

Note: the name comes from the shape of the door, which is rather like an inverted Anasazi door. I have no idea if the Anasazi built ovens even remotely similar to this one.

55 bricks (7 5/8"x3 5/8"x2 1/4")
 8 half bricks (3 13/16"x3 5/8"x2 1/4")
 1.59 cubic feet concrete (2 80lb and 1 60lb bags of quikrete)
 0.22 cubic foot sand (about 25 pounds)

2 2x4s
 1 sheet plywood

About 500 pounds and \$60
